Professional Summary

Full Stack Developer with a solid foundation in Information Technology and practical experience through multiple real-world internships and team-based projects. Proficient in developing scalable and maintainable web applications using ASP.NET Core, Web API, React, and Microsoft SQL Server. Demonstrated ability to integrate cloud services such as Azure and implement robust backend architectures. Committed to writing clean, maintainable code and continuing to grow as a backend-focused software engineer.

Academic History

Azerbaijan State Oil and Industry University (ADNSU) | 2021-2025
Bachelor of Science in Information Technology

STEP IT Academy | 2022-2025

Software Developer

Languages

English
Upper-Intermediate

Azerbaijan
Native

Turkish
Advanced

Skills

Backend Developer
C#, .NET Core, ASP.NET MVC, Web API, Entity Framework Core, ADO.NET, LINQ, RESTful API

Database Management
MongoDB, Microsoft SQL Server (MSSQL),

Cloud & DevOps
Microsoft Azure (File Storage, Blob Storage, Queue), Docker, Docker Compose, Redis, RabbitMQ, CI/CD Pipelines

Frontend Development HTML, CSS, JavaScript, React.js, Next.js, Angular, Native (Expo)

Software Architecture
OOP (SOLID Principles), Microservices & Monolithic Architecture, Design Patterns (Repository, Unit of Work, Dependency Injection)

Tools & Technologies
Git (GitHub, GitLab), Postman

Work Experience

LV Logistics | Baku, Azerbaijan **July 2025-Present**
System Developer

- Developed and deployed Azure Functions integrated with Power Platform to automate business workflows
- Built custom APIs consumed within Power Apps and Power Automate pipelines
- Designed automated workflows to optimize logistics processes and reduce manual workload
- Integrated internal and external data sources into Power Platform solutions via REST APIs
- Maintained and improved existing software applications to ensure performance and reliability

Work Experience

Unibank | Baku, Azerbaijan **February 2025-June 2025**
Frontend Developer Intern

- Developed and maintained UI components using Angular
- Integrated REST APIs using Angular's HttpClient module
- Participated in code reviews and used Git for version control
- Used Jira to manage tasks within Agile sprints

Startup Project | Baku, Azerbaijan **January 2025-April 2025**
Backend Developer

- Integrated Azure Blob Storage for file and image upload functionality
- Developed CRUD operations using ASP.NET Core Web API
- Focused on performance optimization with dynamic data in MSSQL
- Contributed to technical documentation and collaborated using Git

Intern Intelligence | Remote **January 2025-February 2025**
Backend Developer Intern

- Integrated and stored external API data into MSSQL
- Ensured system security and implemented duplicate request prevention
- Worked on real-world API-based solutions with a focus on system stability
- Designed and optimized database structures

Certificates

Software Developer **2022-2025**
Intensive 2.5-year program focused on software engineering, object-oriented programming, web application development, and database systems.

Startup Project - Banquet **2024-2026**
4 month of active participation and project experience with the team

Intern Intelligence - Remote Internship Certificate **2025**
Gain hands-on experience in RESTful Web API development, working on real-world projects, and a breadth of software development.

Certificateof activeparticipation **2023**
This certificate is given by DDI C for her active participation in the one month Startup Bootcamp

Projects

Task Flow | Task and Project Management

Full Stack

- Built RESTful APIs using ASP.NET Core Web API and implemented JWT-based authentication & authorization.
- Developed an interactive task management system with drag-and-drop workflow (Kanban-style).
- Integrated GitHub OAuth and automated repository & branch creation per project and task.
- Implemented GitHub Webhooks to synchronize pull requests and task statuses automatically.
- Integrated Stripe payment system for subscription-based project access.
- Implemented real-time notifications and online user tracking using SignalR.
- Designed relational database architecture with Entity Framework Core and MSSQL.
- Integrated Cloudinary for secure image storage and management.
- Implemented email notifications using SMTP services.
- Added AI-powered features for task assistance and workflow optimization.
